

Technical Rider

Running time: 1 hour 30 minutes

Touring party: 3 people

We will bring:

laptop

software to run the show

media files for the show

items to create altar/installation

platforms for the projectors to sit on

We will need you to provide:

Professional Sound System, including:

*sound Mixer and amplifier (a powered mixer is fine) for one 1/4 phone jack, line-level in
four speakers*

plenty of speaker cable to place speakers around the room (see the diagram for layout)

Video Projectors:

3 projectors, 2000 to 3000 lumens (or brighter) with proper inputs (see next page)

Video Cabling:

one long length of video cable to reach from computer to someplace near the projectors

one S-Video splitter to separate the one main signal into three

three shorter lengths of cable to reach from splitter to each projector

This cable and the splitter can be one of several formats:

*PREFERRED: RGBHV (5 strand BNC) — which also requires four RGBHV DVI- or VGA-to-5-strand BNC break-out:
(DVI or VGA, depending on which is on the projectors)*

ACCEPTABLE: S-Video (projectors must have S-Video in)

It's very important to plan ahead and get all the video cabling parts needed, so if you do not have someone in-house who understands this technology, please find a professional rental house in your area and consult with them. For additional information about the video cabling, please contact us.

Lighting:

We'll need you to provide all lighting equipment. There is no lighting plot, no lighting cues, no color: the space is lit like a visual art gallery — white light, softly illuminating the whole room, focused on performing areas, away from the screen and out of the audiences' eyes.

Additional Set Pieces:

sturdy rocking chair

small platform for performer (2'x2' -ish)

small tech table (to be in the audience)

chair for tech table

small platform to elevate tech table

chairs for the audience

Supplies:

black tie-line for hanging the projectors, screens and drapes

ratchet straps for the projectors (to strap them to the platforms we bring)

suction steam iron with vertical-ironing capability

Experienced Crew (with tools):

A small crew of to help install the show. A safe, full-sized ladder
